

ICD-10 Readiness Survey Results

PCS performed a survey to assess awareness in the hospital community regarding the implementation of X12 standard, version 5010 electronic filing standards by October 1, 2012, and ICD-10-CM/PCS code set by October 1, 2013. We invited hospitals to fill out our survey and of the 300 hospitals that received the invite approximately 20 responded. Although a very small sample, some of the results are interesting points to address.

% Aware of Implementation of X12 Standard, Version 5010 Electronic Filing and ICD 10

Additional Results

- Overall awareness and preparation for this transition shows room for improvement.
- 10% of respondents have created a committee to transition into ICD-10.
